

VLADIMIR LASHIN

SOFTWARE TESTER | VNLASHIN@GMAIL.COM | 063-868-22-31

OBJECTIVE

I'm looking for an interesting job as a test engineer, where I can realize myself and grow professionally.

SKILLS

- Functional testing
- Integration and system testing
- Regression testing with writing autotests
- Exploratory testing
- API testing
- SQL - testing
- Usability testing
- ERP testing
- Acceptance testing
- Writing test artefacts
- Writing and testing user scripts

TOOLS

- Robot Framework
- Selenium + PyTest
- Playwright
- Postman and SoapUI
- MySQL
- Jira
- Trello
- Confluence
- GitHub
- Figma
- XMind
- etc.

ABOUT ME

I am a responsible, flexible test engineer who can work both in a team and alone. Stress-resistant, result-oriented, and hard-working person.

With a broad outlook and plans for a professional life.

Socially responsible and able to adapt to different situations.

I have testing experience around 3 years (in automated testing around 2 years)

I am allowed to work freely. And I don't need a visa.

EXPERIENCE

TEST ENGINEER • POLTEQ • JUN 2023 – MAY 2024

Polteq is an "outstaff" company in the field of software testing and quality assurance.

I was involved in an intern project and involved in integration testing at the customer.

Polteq has started the internal development process for its new testing tool, including the fundamental Agile/Scrum testing process.

I worked as an Agile Tester to validate and validate home-grown quality and collaborated with the development and testing team to achieve this goal. Thanks in part to my help, her sprint development process was successful.

Activity:

- Iterative functional testing of the Polar instrument
- Structured testing by preparing, limiting, executing, and analyzing test cases and results
- Participate in mutual collaboration between the test team and the development team
- Attending and participating in various team meetings (including stand-up meetings)
- writing functional tests for regression testing using the Selenium tool

Involved in an external project as a back-end tester:

- working with Swagger - and REST API documentation
- writing test cases for API testing
- Using Postman for API testing
- partial automation (script writing) Postman
- drawing up test reports
